

FEATURES

	PAGE	ISSUE
A clever country through science education? A plea for science educators to engage the debate. <i>Annette Greenall Gough</i>	8	129
A mine of information or a minefield? A critique of "Nuclear Electricity". <i>R Cross & R Price</i>	38	128
Assessment in physics: Further exploration of the implications of item context. <i>Leonie J Rennie & Lesley H Parker</i>	28	131
Biology enrolments in Australian secondary schools: trends and implications. <i>J R De Laeter & J Dekkers</i>	24	129
Charting southern skies with the aid of a spread sheet. <i>K Lucas</i>	26	128
Electrolysis according to Trudy. <i>Beverley A Stanbridge</i>	20	129
Frameworks to support student discussion focussing on surrogacy and human experimentation. <i>Wilhelmina Van Rooy</i>	21	131
Getting thinking into science questions. <i>John Langrehr</i>	33	131
History in science education: Why, what and how. <i>T Sprod</i>	14	128
Justifying the dissection of animals in biology teaching. <i>Anthony G Wheeler</i>	30	130
Laboratories in schools: material places, mythic spaces. <i>Noel Gough</i>	29	129
Lightning: teaching physics in context. <i>Dorothy Kearney & Helen Ormiston-Smith</i>	16	131
The contribution of technology to science. <i>Paul L Gardner</i>	25	130
The Global Thinking Project: Shared concerns and experiences across the continents. <i>Jack Hassard & Roger Cross</i>	18	130
The historical independence of technology and science. <i>P L Gardner</i>	9	128
The induction of beginning science teachers: Some guidelines for a mentoring approach. <i>Alan Cook & David Smith</i>	14	129
The teaching of learning strategies. <i>Ann Campbell</i>	11	131
Saving Ozzie skins from ozone depletion. <i>Sharon Beder</i>	7	130
School grounds design: A holistic approach. <i>Henry Mancini</i>	11	130
Science teachers, professional development and the role of CONASTA. <i>L Rennie & B Sova</i>	33	128
Senior biology for the student with a vision impairment. <i>Ken Squires & Diane Schwartzkoff</i>	8	131
Werewolves and vampires; And does the garlic really work? <i>A Wheeler</i>	21	128

SCIENCE NOTES

A simple means of teaching the greenhouse effect. <i>I T Townsend</i>	58	129
Balance: Some responses. <i>Chris Dawson & Jack Rowell</i>	41	131
Balance: We had (still have?) a problem. <i>Chris Dawson & Jack A Rowell</i>	55	129
BP oil refinery links with Pine Rivers State High School. <i>Graham Crosswell</i>	39	131
Bottle biology. <i>Peter Jager</i>	53	130
Bottle biology: Further ideas for teachers. <i>Peter Jager</i>	44	131
Chemistry with inexpensive materials: Spray bottles and plastic bags. <i>S Zoltewicz</i>	48	128
Children's ideas about minerals and rocks. <i>Terry Evans</i>	57	131
Demonstrations using liquid nitrogen. <i>Andrew Dodson</i>	48	131
Down-scaling chemistry: the quiet revolution in the teaching laboratory. <i>Warren F Beasley</i>	50	130
Electroplating, economic awareness & enterprise. <i>Mike Thomas</i>	54	131
Examining crystals with the use of a laser. <i>Stratakus Koultras</i>	57	130
Food colour identification by paper chromatography. <i>Philip Hannaker & Shirley Cocks</i>	62	130
Forces on current carrying conductors in magnetic fields. <i>Rob MacPherson</i>	42	131
From Maxwell to Milliken: A little history and a little hands-on with the photoelectric effect. <i>J Gipps</i>	59	128

	PAGE	ISSUE
How many replicates? <i>B Kentish</i>	56	128
Learning the characteristics of living things. <i>P Eastwell</i>	51	128
Making fossil moulds. <i>F Parker</i>	45	128
Measuring motion using a Macintosh computer. <i>Jon M Pearce</i>	44	129
Modelling DNA mutations in the classroom. <i>Robert Thurman</i>	50	131
Monitoring human muscle and heart activity. <i>Andrew W Wood & Wayne Ganther</i>	43	130
Newsprint: A tool for simulating community analysis. <i>Barry Kentish</i>	59	129
Parents as a resource for science and technology education. <i>JG Geake</i>	52	129
Popularising science through television: Where are we now? <i>B Robertson & W Palmer</i>	46	128
Science teaching across the world. <i>D Lloyd</i>	53	128
Studying DNA in the classroom. <i>Silja Zarins</i>	58	130
Survival game. <i>John Burnett</i>	57	129
Teaching "Issues" in science. <i>Thelma Pike</i>	47	130
The game's the thing #3: Simulations in the science class. <i>Mitch O'Toole</i>	38	130
The quantitative determination of food dyes using visible spectrophotometry. <i>Philip Hannaker & Shirley Cocks</i>	52	131
Using creative writing and drama to learn science. <i>Helene Hiotis</i>	37	129
Using dramatic improvisation in science teaching. <i>Sue Whitaker</i>	41	129
What's an analemma anyway? <i>Robert B Thurman</i>	61	129
Where is the reaction? <i>Peter De La Rue</i>	43	131
Whodunit? - A "forensic" chemistry exercise. <i>James Sillitoe, Peter Webb & Ian Sullivan</i>	59	131

RESEARCH

An assessment scheme for upper secondary physics essays. <i>Patrick Cronan, Lola Brown & Judith Pollard</i>	63	131
Australian secondary school students' concepts regarding the nature of science. <i>A Griffith & C Barman</i>	69	128
Probing students' non- scientific conceptions: a new tool for convential and action-research in science teaching. <i>J Rowell, C Dawson & P Madsen</i>	62	128
Some misconceptions in chemistry: A cross- cultural comparison, and implication for teaching. <i>Ngoh-Khang Goh, Lian-Ee Khoo & Lian-Sai Chia</i>	65	130
The development of a unit on 'Buoyancy' using a children's science approach. <i>K Vance, K Miller & B Hand</i>	63	129
Towards an alternative mode of assessment in senior chemistry: using cognitive criteria. <i>Beverly Stanbridge</i>	69	130
